

Disclaimer

This book is not intended to be predictive in any way, only informational. Although the evidence may appear to be conclusive, it is not my intention to draw any conclusions for you. Just look at the evidence presented and make **your** decision. The evidence in this book is not complete and is a poor representation of what God has made available to us. There is a whole lot more to be said here, but I felt that this book needed to be published A.S.A.P.

This book was written at night after work in pieces and quickly assembled into a Book that organizes information in a point by point format. Much of the Satanic misinformation about what the Bible actually says, has to be considered while presenting what it actually says. Therefore the point by point approach that deals with **what the Bible does say**, will also contain information about **what it does not say**.

If you are not aware of some of this misinformation it may seem like a joke that you didn't get. But if you are exposed to that kind of misinformation, **you will recognize it** for what it is.

I am not a date setter but God is. God gave Israel 7 feasts for a reason. He divided them up into two groups, spring and summer for a reason. The first four Feasts were fulfilled on their day and in their order, for a reason.

The next Feast in line to be Fulfilled is the Feast of Trumpets, also known as Rosh Hashanah. **Every year**, believers all over the world should be counting the days till Rosh Hashanah. The Bible tells us to watch. Whatever year it happens, I believe the Rapture will happen at the end of that Feast Day, the moment the Shofar is blown at sundown in Jerusalem half way around the world. That would be 6pm Jerusalem time and 11am Eastern Standard Time. That is the day and the moment, all we need to know is the year. So how is this year looking for you?

If the Rapture doesn't happen this year, then we have one more year and we start counting the following day.
